

CHIRAYU MISHRA

Jaipur, Rajasthan | chirayumishra24@gmail.com | +91 9352657384 | github.com/chirayumishra24

PROFESSIONAL SUMMARY

Dynamic **Full-Stack Developer** and **Product Associate** with a strong foundation in building scalable web applications, optimizing user experience (UX), and steering cross-functional alignment between engineering and product design teams. Proficient across the **MERN stack (Node.js, Express, MongoDB, React)** and **PostgreSQL**. Experienced in leveraging modern **AI-assisted engineering tools** for hyper-rapid application prototyping and leveraging serverless cloud backends like **Firebase** and **Supabase**. Demonstrated expertise in technical product ownership, requirement elicitation, comprehensive **PRD documentation**, and end-to-end agile feature execution.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python

Backend Architecture: Node.js, Express.js, RESTful APIs, Token Authentication, MVC Architecture

Frontend Engineering: React.js, Tailwind CSS, EJS, Responsive Web Design

Databases & Cloud: PostgreSQL, Supabase, MongoDB, Firebase (Auth / Cloud Firestore), Object Storage

Developer Tools & Methodologies: Git, GitHub, Postman, VS Code, Cursor/v0/Bolt Engine Prototyping

Product & QA: Product Requirement Documents (PRDs), User Flows, Quality Assurance (QA) Testing, User Research

WORK EXPERIENCE

Product Associate (Intern → Full-Time)

Sep 2025 – Present

SkilliZee • Intern (Sep 2025 – Nov 2025) | Full-Time (Nov 2025 – Present)

- Spearheaded product discovery and scoped core web feature configurations by authoring concrete **Product Requirement Documents (PRDs)**, user flows, and functional feature specifications.
- Conducted thorough **user research** and quantitative usability diagnostics to map and rectify complex friction loops within the application lifecycle.
- Interfaced natively across engineering, UI/UX design, and business teams to transform high-level roadmaps into production-ready tasks within the dev environment.
- Drove continuous sprint cycles, grooming meetings, **backlog prioritization**, and core product roadmapping to preserve steady product releases.
- Executed extensive market research and **competitive benchmarking** matrices to identify potential feature vectors and white spaces for product improvements.

KEY PROJECTS

reach-ai — Multi-Channel Smart Outreach Platform

React, Supabase, Node, Tailwind CSS

- Architected an automated multi-channel client engagement tracker utilizing **AI-driven generation tools** to accelerate architectural design and minimize boilerplate cycles.
- Leveraged **Supabase** for federated database administration, configuring robust **PostgreSQL** schemas and real-time backend communication modules.
- Implemented secure customer authentication flows and created an analytic tracking dashboard with Tailwind CSS to visualize user funnels and retention rates.

SAT — Automated Student Assessment Test Suite

React.js, Firebase, Express, Node.js

- Engineered a centralized examination engine adopting modern **AI-assisted engineering models** to dramatically shorten prototyping and development horizons.
- Configured **Firebase Authentication** alongside **Cloud Firestore** to seamlessly secure candidate data logs and safely broadcast active live assessments.
- Developed high-concurrency **REST APIs** to compute marks instantly, manage complex evaluation arrays, and render dynamic reports upon completion.

Companio — Real-Time Travel Companion Matcher

Node.js, Express, MongoDB, EJS

- Built an algorithmic matching social system optimizing match ratios by mapping travel destinations, synchronized schedules, and user interest keywords.
- Constructed isolated session authentications and configured responsive card-swipe gesture components using native HTML/CSS layouts.

Digital Masly — Modular Portfolio Architecture

HTML5, CSS3, EmailJS (Gmail API Integration)

- Designed an optimized personal brand presence web portal centered entirely around lightning-fast render performance, asset compression, and accessibility.
- Integrated asynchronous event handlers through EmailJS to stream contact verification forms directly into central mail clients.

EDUCATION

B.Tech in Computer Science & Engineering

Dec 2021 – July 2025

Institute of Engineering & Technology, Mohanlal Sukhadia University, Udaipur • CGPA: 7.5

CERTIFICATES

- **Full Stack Web Development Certificate** – Complete structured framework immersion in HTML, CSS, JavaScript, Node.js, MongoDB, and React.
- **Backend Engineering Internship Certificate** – Specially recognized for developing an end-to-end real-time Speech-to-Text Transcription system powered by Node.js and Mozilla DeepSpeech.
